WORKSHEET • EDITION 1

RISK & MONEY MANAGEMENT

The1% Risk Plan

Worksheet

Write your risk rules down once, while you are calm, so you never have to invent them in the middle of a trade. Fill it in, sign it, and keep it next to your screen.

TRADE COMMITMENT

Your account and your risk

Start with the numbers. Everything else in this plan is built on them.

Account balance

Risk per trade (% of balance)

Money at risk per trade

Maximum open trades at once

Maximum total open risk

The1% default: 1% per trade, 0.5% on prop firm challenges or while you are learning a new strategy. Never more than 3% open across all trades.

Section 2 • Stops and targets

Where does my stop go, and what buffer do I add?

Describe the structure your stop sits beyond, e.g. the swing low plus spread.

What is my minimum reward-to-risk before I take a trade?

At 2:1 you break even at a 33% win rate before costs.

When, if ever, do I move my stop to break-even?

Write the exact condition, not a feeling.

Section 3 • News and events

How do I check the calendar each day?

What do I do with open trades and new entries around high-impact news?

For example: no new entries 30 minutes either side; reduce open risk to half.

Your rails

Rails stop trading for you before emotion can. Set them here and follow them without negotiation.

RAIL	MY LIMIT	WHAT I DO WHEN IT IS HIT
Daily loss limit		
Trades per day		
Weekly loss limit		
Monthly loss limit		
Cool-off after a loss		

Section 5 • Drawdown and streaks

DRAWDOWN FROM PEAK	RISK PER TRADE	SETUPS ALLOWED
0% to 5%		
5% to 10%		
More than 10%		
Back to normal when...		

After a winning streak, my risk per trade stays...

Streaks are variance. Only a written scaling rule should change your size.

How will I make sure I never trade without a stop?

Section 6 • Commitment

Tick one box for every trade that follows this plan completely: correct size, stop at structure, rails respected. Ten in a row, then review.
